Where do you work? Borough or Pan London

Something you have learnt about yourself during lockdown

crazy dreams

i can sketch   road cycling

i like time to myself

amazing poet

i enjoy my own company

miss socialising

sleep poorly

i'm addicted to climbing

resilient   take more time for myself   resilience

miss the pub   i really like gardening

procrastinator   i like the quieter pace

averagr bassist

i make cooking videos

i like eating out   dance videos

neighbours   patient

beer

knitting

i can bake

routines

20

Any examples of practice you would like to share?

Know-how sharing

I think the issue of safeguarding and ethics is huge for smaller organisations who don't have much resources so training and signposting in this area please

Are there more case studies from smaller organisations / charities who have done work in this area?

3

What has been useful about this session?

Process sharing, numbers, ideas

Learning how to show notes when presenting!!

Case studies are really, really useful

Hearing about succesful case studies

Great ideas on engaging young people in research

Hearing the individual stories of research projects

Collaboration is the key for the success

Case studies and tip around using local universities

Case studies worked really well and were really informative. Hearing more about the recruitment, budgeting and some key challenges here. Lots of food for thought!

20

What has been useful about this session?

Really useful to see other shared experiences from those who have undertaken research and how to ensure peer/youth led takes priority. Would be good to see more research targetted around disability and disadvantage groups

Hearing different approaches and how projects have developed

Tips on recruitment and engagement

seeing core areas of focus that came out of the research and common threads. That PYL are gathering useful research and projects to be a hub of resources and information.

Sharing realism and challenges

Looking at the different approaches to research

Great to hear your key findings and learnings, and how you have partnered with others in the sector

Walking us through your process from start to finish has helped me to think about how it could look in my own context

Seeing how many young people peer researchers can reach, the importance of building relationships with peer researchers, especially with those from disadvantaged backgrounds to get more insight

20

What has been useful about this session?

Knowledge sharing. Great tools and information for accessing hard to reach groups when trying to gather data.

Hearing the different approaches . particularly interested in ensuring those who wouldn't normally participate were engaged. Eg BME, disabled young people

20

What else would you find useful ?

1-1 session on guidance and planning

1 place to see the studies using peer research, examples of surveys/tools used, and tools for training peer researchers.

Safeguarding and ethics in peer research

The application of the research- how can we use the young people for decision-making or co-creation going forward.

Examples of best practice re: specific research methodologies e.g. how to conduct in-depth interviews, focus groups

Engaging a diverse group and encouaging those not normally involed

Who to engage locally and how How to pitch what's in it for them

Support engaging with local authorities Funders saying they would recognising research Support on how we keep data 'live' once the project ends

Approaching the analysis

15

What else would you find useful ?

Safeguarding!

Hearing from the young people more directly about their experiences on these projects - what do they gain from them? Do they feel invested in the outcomes?

Safeguarding and ethical research

Researching engagement methods throughout Covid-19. Learning from challenges and sharing good practice.

Guidance and good practice - what works and doesn't work. Along with how to run a successful budget with limited cost given that research is not cheap. accessible research will naturally cost more with translation/captions etc...

support in training peer researchers and how to be inclusive in recruitment
